1 All parameters NOT specially mentioned are measure	ed at 230VAC input, rated load and 25°C of ambient temperature.			

All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.
Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1μF i 47μF parallel capacitor.

Tolerance includes set up tolerance, line regulation and load regulation.
Setup and rise time is measured from 0 to 90% rated output voltage.

5. Power supply is considered as component not indented to apply by end-user. Power supply meets safety and EMC standards however the final equipment with power supply must be re-quality to comply with EMC Directives. 6. By built-in potentiometer.
