

Kontakt PCB plus

PCB cleanser is designed to clean any residues after soldering from the surfaces of printed circuit boards. It dissolves flux residues, including rosin. The liquid does not attack the substrate or structural elements of printed circuit boards. Special brush allows to precisely access to the cleaned surface, for this reason it may remove even the smallest particles and debris. Perfect for cleaning PCBs after repair and assembly.

Physicochemical properties	
State of matter	gas
Odour	characteristic, alcoholic
Color	transparent
Density at 20° C	0,79 g/cm ³
Viscosity at 20° C	22,8 cP
Solubility in water	dissolves

Application:

- the product does not leave deposits,
- evaporates very quickly,
- removes residues after soldering,
- perfect in any electronics service,
- the product does not react with most plastics used in electronics.

NOTE !

The container is equipped with a special applicator to allow for perfect cleaning without having to apply aggressive solvent mixtures.

Packagings:

Volume	Type of packaging	Collective packaging	Item Code
100 ml	aerosol	4/20	ART.AGT-237
400 ml	aerosol	12	ART.AGT-238

Warehousing:

Keep away from sources of heat, hot surfaces, sparks, open flames and other sources of ignition. Protect from sunlight. Do not expose to temperatures exceeding 50° C/122° F
