

Graphite grease

Grease with graphite addition. Contains specially selected additives for excellent lubrication and effective corrosion protection. The addition of graphite increases the grease resistance to loads. It is characterised by water resistance.

Physicochemical properties		
State of matter	paste	gas
Odor	characteristic	
Color	grey	
Density at 20° C	~0,9 g/cm ³	
Solubility in water	not soluble	
Water content	2%	
Penetration after working at 25° C	270 mm/10	
Dropping point	85° C	
Operating temperature	-20° C to 60° C	

Application:

- car springs,
- worm gears and toothed gears,
- threads and screws exposed to corrosive action,
- chains and other heavily loaded friction nodes operating at temperatures between -20° C and 60° C.

Packagings:

Volume	Type of packaging	Collective packaging	Item Code
65 ml	squeezer	6	ART.AGT-079
100 ml	aerosol	4/20	ART.AGT-148
400 ml	aerosol	4/12	ART.AGT-175

Warehousing:

Store in a well-ventilated, cool place. Keep away from children. Protect from sunlight and temperatures above 50° C. Always keep in original packaging. Do not use contaminated, empty packaging for other purposes.
